

# RV10P - Ridge Vent

## BPIR Declaration

Version: V1

---

### Designated building product: Class 1

---

### Declaration

Blue Building Solutions Ltd t/a VENT has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

---

### Product/system

Name	RV10P - Ridge Vent
Line	
Identifier	RV10P

---

### Description

The RV10P - Ridge Vent is specifically designed for long run metal roof cladding with trough depths up to 34mm. The RV10P is designed to allow warm moist air to escape the roof cavity by means of natural convection of the warm air or by means of negative pressure created by wind movement over the roof.

The RV10P can be cut in half to create Apron, Barge or Abutment vents.

The RV10P comes with an adhesive and flexible aluminium flashing attached which is designed to form to most cladding profiles, preventing water ingress on any roof pitch.

Essential for use on all skillion roofs of any degree pitch and trussed roofs greater than 30°.

Compatible with corrugate and trapezoidal roof cladding profiles. Suitable for new builds or renovations and to be used as part of a proprietary ventilation system.

Measurements: 1200mm L x 300mm W x 20mm H

---

## Scope of use

- Whilst essential for use on all skillion roofs of any degree pitch and trussed roofs  $>30^\circ$ . The VENT Ridge Vents can be applied to trussed roofs with a pitch  $<30^\circ$
- Compatible with corrugate and trapezoidal roof cladding profiles.
- Suitable for new builds or renovations.
- To be used as part of a proprietary ventilation system
- Recommended application: For cladding profiles with a trough depth  $<34\text{mm}$

---

## Conditions of use

- RV10 Ridge Vents must be installed in accordance with product installation guide
- RV10 Ridge Vents can installed on both timber or steel roof and wall framing
- RV10 Ridge Vents are suitable for use with profiled metal claddings.

---

## Relevant building code clauses

---

### Contributions to compliance

B1.3.1, B1.3.2 and B1.3.4 Vent Ridge Vents meet the requirements for loads arising from gravity loads, wind and impact [i.e. B1.3.3 (b), (h) and (j)]

B2.3.1 (b) - Vent Ridge Vent has a durability of 15 years if designed, used, installed and maintained in accordance with the statements and conditions found in the Ridge Vent's product technical statement. Please refer to the PTS for more information.

E2.3.2, E2.3.5 and E2.3.6 - Vent Ridge Vento meets these requirements if designed, used, installed and maintained in accordance with the statements and conditions found in the Ridge Vent's product technical statement. Please refer to the PTS for more information.

E3.2 (c) - Vent Ridge Vent contributes to meeting this requirement if designed, used, installed and maintained in accordance with the statements and conditions found in

the Ridge Vent's product technical statement. Please refer to the PTS for more information.

F2.3.1 - Vent Ridge Vent contributes to meeting this requirement if designed, used, installed and maintained in accordance with the statements and conditions found in the Ridge Vent's product technical statement. Please refer to the PTS for more information.

---
