

# BUILD A SUSTAINABLE FUTURE WITH DRISPACE

## ECODRI FR ROOF UNDERLAY

### INTRODUCING THE NEW ECODRI FR ROOFING UNDERLAY

DriStud EcoDri FR is a cutting-edge, eco-friendly roof underlay designed with both sustainability and performance in mind. Crafted from 80% GRS (Global Recycled Standard)-certified recycled non woven materials.

With its innovative design, EcoDri FR features a microporous, water-resistant film laminated to two layers of polypropylene non-woven. This advanced construction enhances the weathertightness of buildings by serving as a secondary protective layer beneath roof claddings.

This heavy weight, fire-retardant and vapour-permeable underlay reflects a strong commitment to green building practices without compromising quality or durability.

### FEATURES & BENEFITS

- Codemark™ Certified
- Fire retardant
- 80% recycled material
- High vapour permeance
- Water resistant
- Cost effective
- Can be used as wall underlay
