DRISPACE

DriSpace is a division of TCL Hunt, a New Zealand company whose origin dates back to 1937.

TCL Hunt has been a leader in the supply of high quality technical products and equipment to many different industries including the building sector.

The DriSpace product range comprises of three brands, with varying capabilities.

— DRISTUD: Fire Retardant Wall Wrap, Fire Retardant and non-Fire Retardant Roof Underlays, Window Flashing Tape and Self-Supporting White Faced Foils.

— VENT: Passive Ventilation products for roof and wall.

— PROCTORPASSIVE: Technical airtight wraps, ranging from high vapour permeable self-adhesives, UV resistant wraps and vapour retarder and convection barriers.

TCL Hunt has a Quality Management System which includes ISO 9001 certification. That said, there is no finish line in business, so all staff are committed to the process of continuous improvement, relishing the challenge to always provide best practice solutions, with products and services that build trust and maintain customer confidence and loyalty.

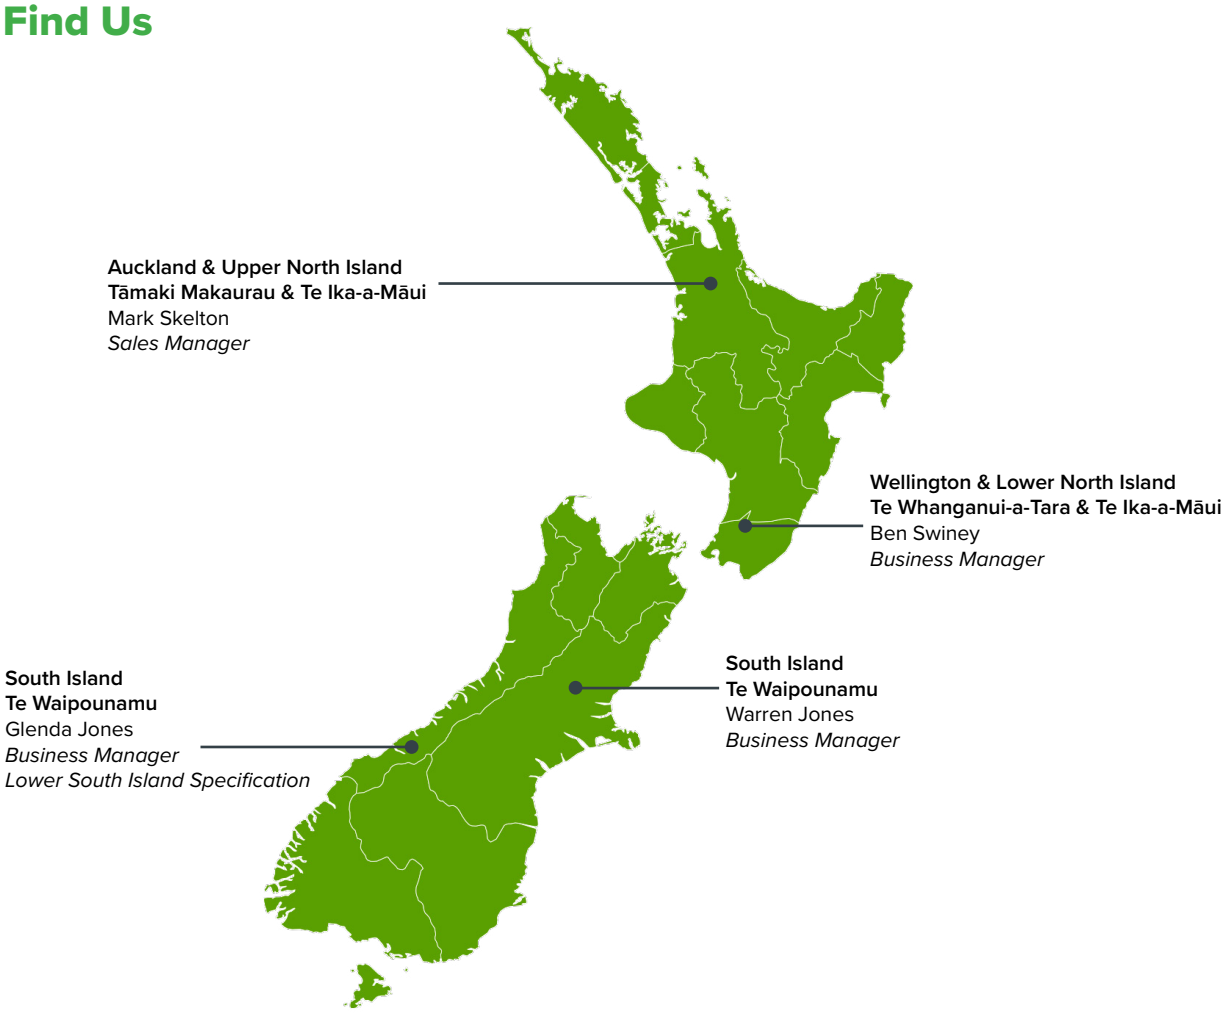

All products are sold through building merchants and roll-formers throughout the country.

Products - DriStud Range
Wall Application

DRISTUD WALL WRAP

- CodeMark™ Certified
- Custom printed locally
- Fire retardant
- Air barrier
- UV resistant: 90 days
- Water resistant, absorbent and breathable
- Suitable for timber or steel framed buildings, suitable for gable ends
- Can be used where cladding is installed over a cavity system or direct fixed cladding
- Suitable for wind zones up to and including 'Very High' and 'Extra High' when used as a flexible underlay over a rigid wall underlay, as outlined in NZS 3604

CodeMark CERTIFIED

AVAILABLE SIZES	
1370mm x 18.5m	25m²
1370mm x 73m	100m²
2740mm x 9.2m	25m²
2740mm x 36.5	100m²

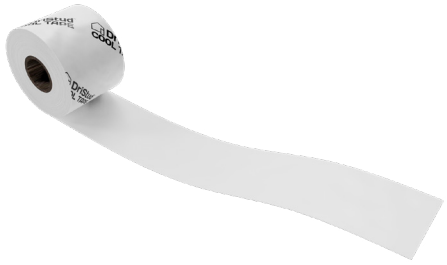

DRISTUD REPEL - FLEXIBLE AIR BARRIER

Temporary weather protection allowing the continuation of internal work without cladding in place

- CodeMark™ Certified
- Custom printed locally
- Fire retardant
- Vapour permeable and water resistant
- UV Exposure: 90 Days
- Suitable for timber or steel framed buildings
- Can be used where cladding is installed over a cavity system or direct fixed cladding
- Suitable for wind zones up to and including "Extra High"
- Thick and strong

CodeMark CERTIFIED

AVAILABLE SIZES	
2740mm x 18.3	50m²
2740mm x 27.4m	75m²

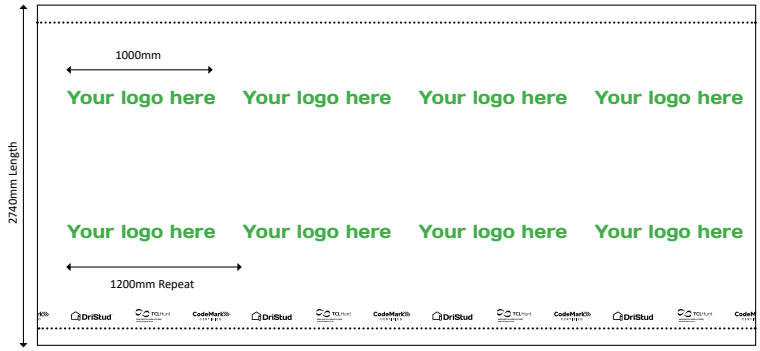

DRISTUD COOL WINDOW FLASHING TAPE

- CodeMark™ Certified
- Service Temperature: -28°C to 80°C
- UV Exposure: 180 Days
- Suitable for residential or commercial, timber or steel framed buildings
- Can be used with DriStud Wall Wrap, REPEL Flexible Air Barrier Wrap, and with rigid air barriers made of plywood, OSB and fibre cement including James Hardie Board.
- Suitable for all wind zones of NZS 3604 up to and including "Extra High"
- 381µm thick
- Only one layer on the sill

CodeMark CERTIFIED

AVAILABLE SIZES	
200mm x 25m	4 rolls/carton
150mm x 25m	8 rolls/carton
75mm x 25m	16 rolls/carton

Custom Print

DRISTUD WALL WRAP CUSTOM PRINT

— Lead time: 1-4 weeks as custom print is done locally in New Zealand
— MOQ: c. 36
— Size available: 2740mm x 36.5m 100m²
— Either a 1 lane print or 2 lane print
— 7 colours to choose from (maximum 2 colours per print)

AVAILABLE COLOURS: Maximum 2 colours per print

DRISTUD REPEL CUSTOM PRINT

— Lead time: 1-4 weeks as custom print is done locally in New Zealand
— MOQ: c. 73 rolls (50m²) & 49 rolls (75m²)
— Sizes available: 2740mm x 18.3m (50m²) & 2740mm x 27.4m (75m²)
— 1 lane print
— 2 colours to choose from

AVAILABLE COLOURS:

For more information on custom print, visit DriSpace.co.nz or call us on **0800 374 7883**

Products - DriStud Range
Fire Retardant Synthetic Roof Underlays

DRISTUD FRU38 ROOF UNDERLAY

— CodeMark™ Certified
— 220 gsm
— Self-supporting
— UV Exposure: 21 days
— Fire retardant
— Breathable and absorbent
— Suitable for wind zones up to and including 'Extra High'
— Can be installed over timber and steel roof framing

CodeMark CERTIFIED

AVAILABLE SIZES	
1250mm x 40m	50m²

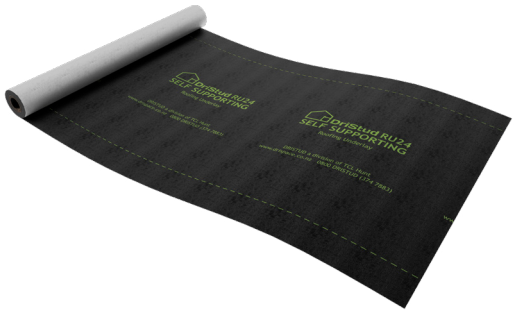

DRISTUD FRU36 ROOF UNDERLAY

— CodeMark™ Certified
— 150 gsm
— Self-supporting
— UV Exposure: 7 days
— Fire retardant
— Breathable and absorbent
— Suitable for wind zones up to and including 'Extra High'
— Can be installed over timber and steel roof framing

CodeMark CERTIFIED

AVAILABLE SIZES	
1350mm x 55.6m	75m²
2700mm x 37.04m	100m²

Products - DriStud Range
Non-Fire Retardant Synthetic Roof Underlays

DRISTUD RU24 ROOF UNDERLAY

- CodeMark™ Certified
- 170 gsm
- Self-supporting
- UV Exposure: 7 days
- Breathable and absorbent
- Suitable for wind zones up to and including 'Extra High'
- Can be used only where fire retardant underlay is NOT required

CodeMark CERTIFIED

AVAILABLE SIZES	
1250mm x 40m	50m²
1500mm x 40m	60m²
2200mm x 50m	110m²

DRISTUD RU22 ROOF UNDERLAY

- CodeMark™ Certified
- 145 gsm
- Self-supporting
- UV Exposure: 7 days
- Breathable and absorbent
- Suitable for wind zones up to and including 'Extra High'
- Can be used only where fire retardant underlay is NOT required

CodeMark CERTIFIED

AVAILABLE SIZES	
1250mm x 40m	50m²

Products - DriStud Range
White Faced Foil & Anti-Condensation Fleece

DRISTUD W11 WHITE FACED FOIL INSULATION

- CodeMark™ Certified
- 190 gsm
- Fire retardant
- Fully synthetic
- Vapour and water barrier
- Used for interior lining for commercial and industrial buildings, sports stadiums and warehousing facilities where extra clean white finish is required

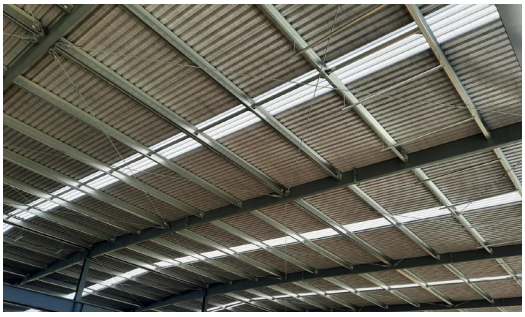

AVAILABLE SIZES	
1350mm x 56m	75m²

DRISTUD W8 WHITE FACED FOIL INSULATION

- Medium weight
- 153 gsm
- Fire retardant
- Vapour and water barrier
- Extra heavy duty
- Used for interior lining for medium sized commercial and industrial buildings, shed, garages where white finish is required
- Offers superior strength, durability and acts as a barrier to radiate heat, moisture, drafts and dust

AVAILABLE SIZES	
1350mm x 56m	75m²

DRISTUD NODRIP - ANTI CONDENSATION FLEECE

A self-adhesive absorbent fleece for metal roof cladding designed to absorb condensation and minimise dripping. When applied to metal roof cladding, it is known as NoDrip®. Sufficient ventilation below the roof effectively prevents condensate from dripping off.

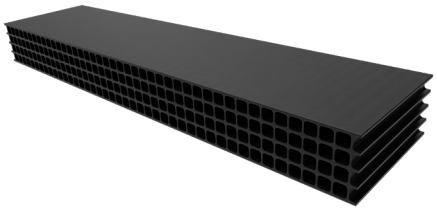

NoDrip® is suitable for the following applications:
- Industrial and commercial buildings
- Grandstands, stadiums and sports halls
- Agricultural buildings and stables
- Parking spaces for machines and vehicles

AVAILABLE SIZES

Please note, DriStud NoDrip is not a stocked item and is brought in on Indent basis.

Please contact DriSpace to discuss available sizes, pricing and order requirements: orders@drispace.co.nz

Products - Vent Range

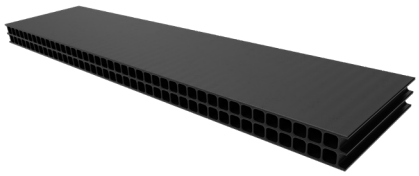

20mm THICK VENTED CAVITY BATTEN - VB20

- BRANZ Appraised (for both roof and wall application)
- Polypropylene ventilated batten
- 20mm cavity for ventilation and drainage in both roof and wall cavity
- Reduces the risk of moisture build up and condensation
- Convenient peel-off adhesive backing which eliminates the need for nails or glue, to adhere to timber, metal and building wraps for temporary fixing
- Easy to install
- Manufactured in 1800mm lengths for easy handling
- Strong and robust providing passive airflow of 16,000m^2 per linear metre
- Insect proof with 4mm vents preventing ingress of nesting insects
- All manufactured using some recycled plastics

BRANZ Appraised
Appraisal No.1099 [2019]

BRANZ Appraised
Appraisal No. 979 [2017]

PRODUCT/CARTON SIZES	LARGE PACK
Quantity	50 units per carton
Unit Length	1800mm
LM Per Carton	90LM

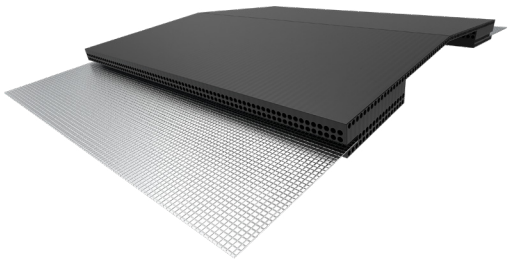

10mm THICK VENTILATION & DRAINAGE BATTEN - VB10

- BRANZ Appraised
- Polypropylene ventilated batten for roof applications
- 10mm cavity designed to facilitate passive airflow and cavity drainage between the roofing underlay and the roof cladding
- Prevents the transfer of dew point from the underside of the roofing underlay
- Convenient peel-off adhesive backing which eliminates the need for nails or glue, to adhere to timber, metal and underlays for temporary fixing
- Easy to install
- Manufactured in 1800mm lengths for easy handling
- Provides passive airflow of 8,000mm^2 per linear metre
- Insect proof with 4mm vents in preventing ingress of nesting insects
- All manufactured using some recycled plastics

BRANZ Appraised
Appraisal No. 979 [2017]

PRODUCT/CARTON SIZES	
Quantity	50 units per carton
Unit Length	1800mm
LM Per Carton	90LM

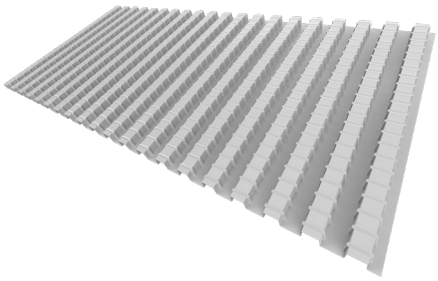

RIDGE VENT/RIDGE VENT DEEP TROUGH - RV10P/RV10DT

- BRANZ Appraised
- RV10P: For roof cladding with a trough depth of less than 34mm
- RV10DT: For roof cladding with a trough depth of 34mm - 48mm
- Releases hot, moisture-laden air to help minimise condensation
- Recommended for cold roof pitch of over 30° and Skillion Roof
- An adhesive and flexible aluminium flashing which is designed to form to roofing profiles and prevent water ingress on any pitch roof
- Forms part of a passive ventilation system that works year round with no moving parts or energy consumption
- Not visible when covered with ridge flashing (NB: Ridge flashing not included)
- Insect proof - Recommended 4mm vents to prevent ingress of nesting insects
- All manufactured using some recycled plastics

BRANZ Appraised
Appraisal No. 979 [2017]

PRODUCT/CARTON SIZES	
Quantity	6 units per carton
Unit Length	1200mm
LM Per Carton	7.2LM

Products - Vent Range

INSULATION GUARD/ROLL PANEL VENT/EAVES BAFFLE - G502CL

- Designed to maintain a continuous 25mm air gap between the underside of the roofing underlay or sarking board and loft insulation at the eaves
- Provides a consistent flow of air into the roof space
- Castellated profile is laid across the top of the roof trusses/rafters parallel with the eaves level
- Ideal for trussed roofs of any degree pitch
- Suitable for both new build and roof renovation projects
- The extra width of the panel allows for better coverage when low pitch and deep insulation details are encountered
- 4 week weather exposure
- Made from recycled plastic

PRODUCT/CARTON SIZES	
Quantity	2 units per carton
Unit Length	6000 mm
LM Per Carton	12LM

OVER FASCIA VENT - G1200N

- Most practical and cost-efficient method of ventilating the eaves for trussed roofs with pitch greater than 15°
- Easy to install
- Designed to discreetly ensure a calculated positive air flow into the roof space between the roof underlay and the fascia board
- G1200N - Airflow of 12,000mm per linear metre or 1/300
- Compatible with either timber or metal fascias
- Designed with 4mm evenly spaced openings specifically sized to prohibit large insects gaining access but wide enough to prevent capillary action

PRODUCT/CARTON SIZES	
Quantity	20 units per carton
Unit Length	1000 mm
LM Per Carton	20LM

OVER FASCIA VENT - G2500N

- Most practical and cost-efficient method of ventilating the eaves for skillion roof, and trussed roof with pitch less than 15°
- Easy to install
- Designed to discreetly ensure a calculated positive air flow into the roof space between the roof underlay and the fascia board
- G2500N - Airflow of 25,000mm^2 per linear metre or 1/50
- Compatible with either timber or metal fascias
- Designed with 4mm evenly spaced openings specifically sized to prohibit large insects gaining access but wide enough to prevent capillary action

PRODUCT/CARTON SIZES	
Quantity	20 units per carton
Unit Length	1000 mm
LM Per Carton	20LM

Products - Vent Range

EAVES COMB FILLER - G1275

- Designed with flexible fingers that adjust to fill the gaps left when using profiled tiles or steel roof cladding
- Prevents entry of birds and large insects
- Eliminates the need to make or buy expensive purpose made profiled fillers that can block necessary airflow into the roof spacing between underlay and roof cladding

PRODUCT/CARTON SIZES	
Quantity	50 units per carton
Unit Length	1000 mm
LM Per Carton	50LM

SOFFIT VENT - G700

- Designed to provide passive airflow into the roof cavity to reduce the risk of moisture build-up
- Suitable for new builds and renovations
- Should be used as part of a proprietary system for trussed and skillion roofs
- Should be used in conjunction with VENT Roll Panel Vent (G502CL) to ensure continuous unimpeded airflow into the roof void
- To be used as part of a proprietary ventilation system
- Only available in white

PRODUCT/CARTON SIZES	
Quantity	50 units per carton
Unit Length	76mm W x 13.5mm
VENT Size	4mm

ROOF SPACE VENTILATION - TRUSSED ROOF

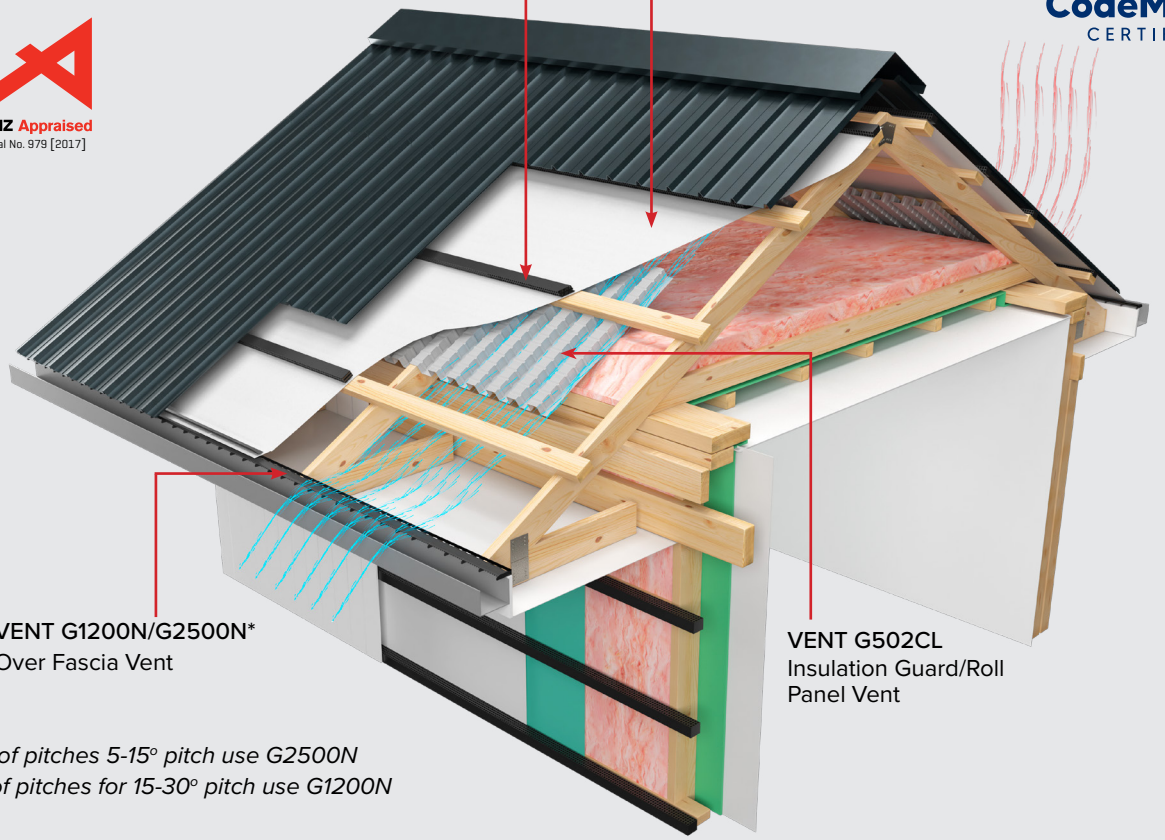

RECOMMENDED MINIMUM ROOF PITCH 5°

VENT VB10
BRANZ Appraised ventilation & drainage batten to prevent dew point condensation

VAPOUR PERMEABLE ROOFING UNDERLAY
CodeMark™ Certified underlays - FRU38, FRU36, RU24, RU22

BRANZ Appraised
Appraisal No. 979 [2017]

CodeMark CERTIFIED

VENT G1200N/G2500N*
Over Fascia Vent

VENT G502CL
Insulation Guard/Roll Panel Vent

**For roof pitches 5-15° pitch use G2500N*
For roof pitches for 15-30° pitch use G1200N

Products must be used in combination as recognised in DriSpace technical details to ensure that essential calculated, continuous, unimpeded passive ventilation is achieved.

Refer to DriSpace Moisture Management Design Guide for more passive roof ventilation details.

ROOF SPACE VENTILATION - SKILLION ROOF

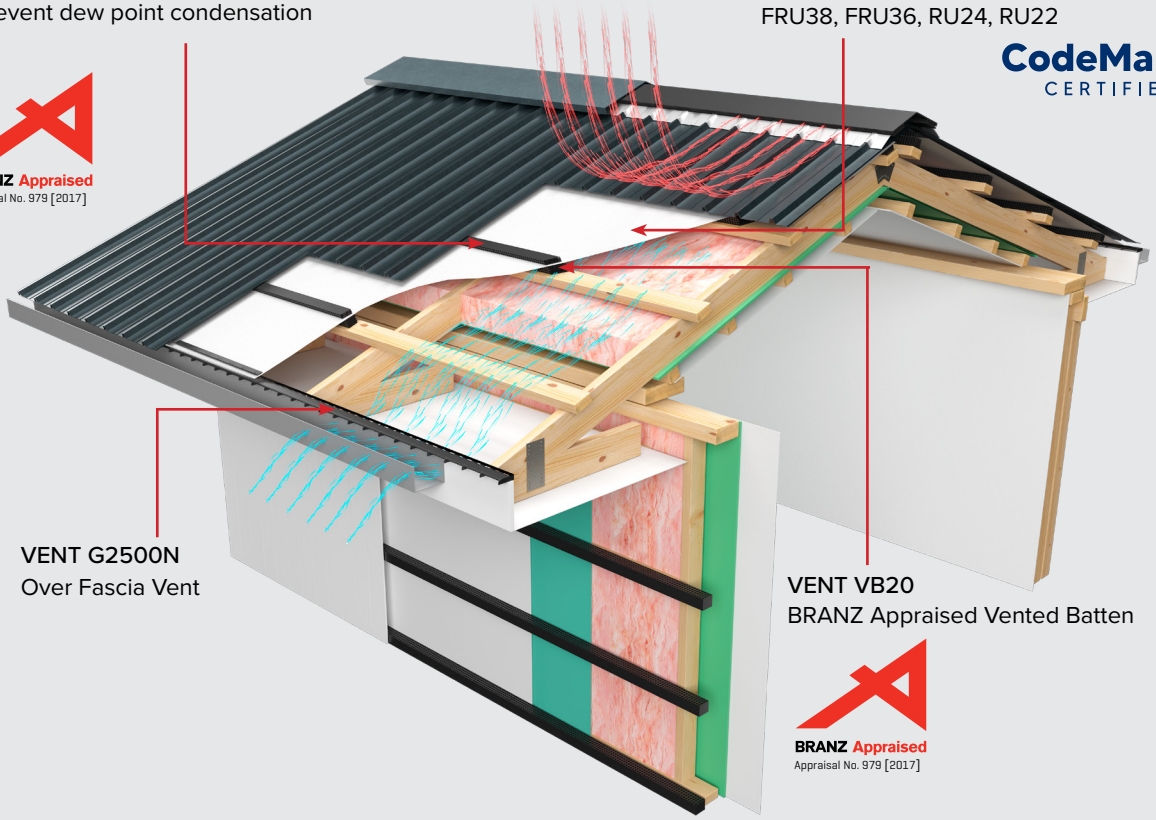

RECOMMENDED MINIMUM ROOF PITCH 5°

VENT VB10
BRANZ Appraised ventilation & drainage batten to prevent dew point condensation

BRANZ Appraised
Appraisal No. 979 [2017]

VAPOUR PERMEABLE ROOFING UNDERLAY
CodeMark™ Certified underlays - FRU38, FRU36, RU24, RU22

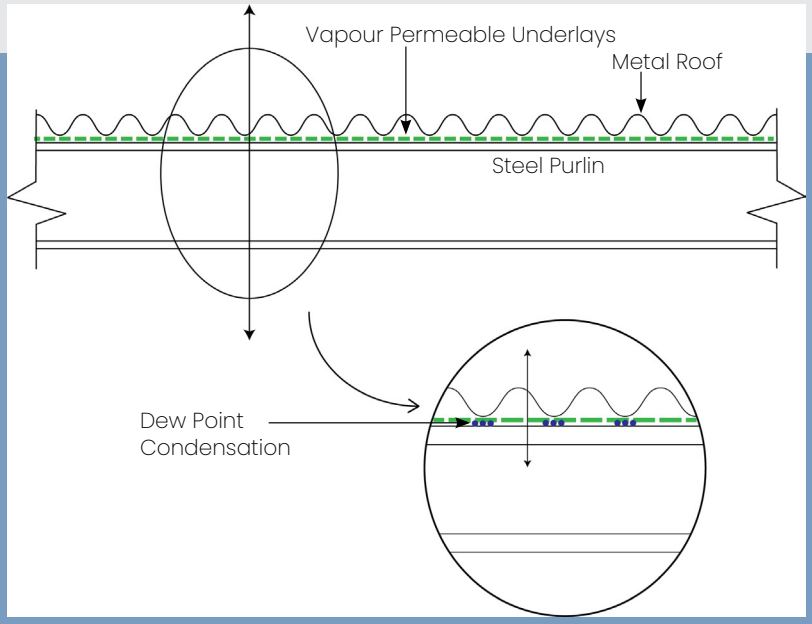

CodeMark CERTIFIED

VENT G2500N
Over Fascia Vent

VENT VB20
BRANZ Appraised Vented Batten

BRANZ Appraised
Appraisal No. 979 [2017]

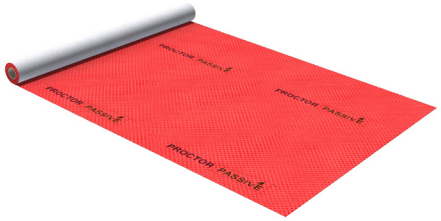

dew point condensation

For steel longrun with large surface contact areas with roof underlays, it is recommended ventilation and drainage above the underlay is created to defer the dew point condensation from the steel longrun.

Install VB10 on top of the underlay to create the ventilation and drainage pathway.

Products - Proctor Range
Self-Adhering Airtight Wraps

PROCTORPASSIVE WRAPTITE SA

- CodeMark™ Certified
- Self-adhering airtight and vapour permeable wrap for wall and roof applications
- Low initial tackiness for ease of installation
- Multiple substrate compatibility
- Fire Retardant
- Tear, rip and puncture resistant during and after construction
- Zero VOCs, and free of any chemicals on the Living Building Challenge Red List
- Passive House Institute Certified Component phA
- Wide service temperature range
- Exceptional airtightness

CodeMark CERTIFIED

PRODUCT SIZE	
Roll Width	1500mm
Roll Length	50m
Coverage	75m²

PROCTORPASSIVE WRAPTITE UV-SA

- CodeMark™ Certified for open-jointed claddings
- Fire Retardant
- Self-adhering
- For prolonged UV exposure or open joint cladding application
- Vapour permeable adhesive layer
- High vapour permeance
- Tough material resists punctures and tears
- Multiple substrate compatibility
- Low VOC's
- Exceptional airtightness

CodeMark CERTIFIED

Airtight Wrap

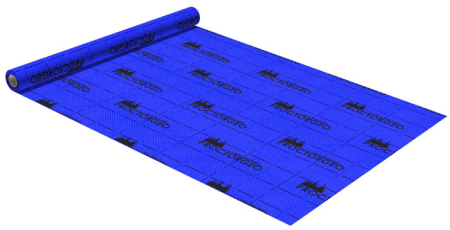

ON INDENT ONLY:
Contact the your sales rep or the customer service team for more information

PROCTORPASSIVE RAINSCREEN RS-IT

- Highly UV stable
- Fire Retardant
- High water resistance
- High vapour permeable wall wrap
- For open joint cladding
- Air tight
- Features factory applied integrated tape (RS-IT)

PRODUCT SIZE	
Roll Width	1500mm
Roll Length	35m
Coverage	52.5m²

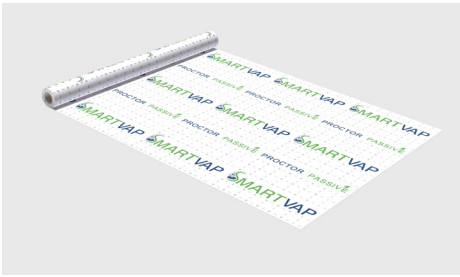

Products - Proctor Range
Internal Vapour Control/Airtight Wraps

PROCTORPASSIVE GEOVAP120

- Vapour retarder and convection barrier
- Two-layer polyolefin non-woven wrap resists the flow of vapour of both diffusion and air movement through wall, ceiling and floor assemblies
- Protects the building fabric and insulation from condensation and related problems such as mould, timber rot, corrosion and loss of thermal resistance
- Ideal for swimming pools and humid buildings
- Factory applied integrated tape
- Non-perforated and non-conductive

PRODUCT SIZE	
Roll Width	1500mm
Roll Length	30m
Coverage	45m^2

PROCTORPASSIVE SMARTVAP

- Complies with AS/NZS 4200.1
- Light duty air barrier with variable vapour diffusion resistance
- Fire retardant (FR Index: ≤5)
- High water resistance
- Non-perforated and non-conductive
- Lightweight and easy to handle
- Compatible with SabreSeal MS Facade and SabreBond SMP50

PRODUCT SIZE	
Roll Width	1500mm
Roll Length	30m
Coverage	45m^2

Products - Proctor Range
Other

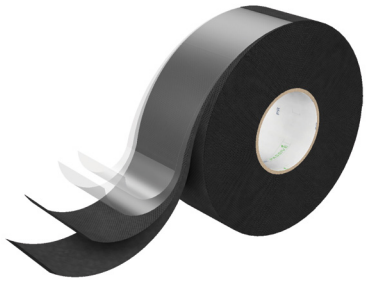

PROCTORGEO HC8 ENKAVENT

- Three dimensional PA (polyamide) monofilament spacer for roof
- Provides permanent drainage channel for condensate or moisture that may get under the roof sheet
- Provides space for continuous air movement between the roof deck/underlay and metal roof
- Reduces corrosion risk - of particular importance with zinc or galvanized steel roof sheets
- UV resistant during installation
- Reduction in impact noise on metal roofing
- Allows for the movement of the roof sheet under temperature fluctuations
- Contributes to reduction in temperature of the roof substrate from solar radiation
- High air void ration (95%) for ultimate drainage capacity
- Flexible and lightweight for ease of install

PRODUCT SIZE	
Roll Width	1020mm
Roll Length	75m
Coverage	76.5m^2

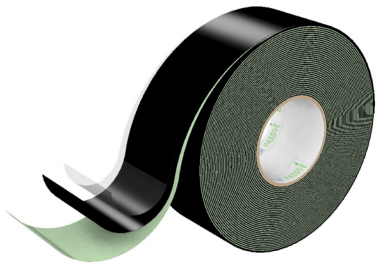

Products - Proctor System Accessories
Windows and Openings Applications

PROCTOR DRIFLASH TAPE

- Window flashing tape with high vapour permeance
- Suitable for High UV Exposure areas
- No primer required on most clean substrates
- Tough material; resists punctures and tears
- Multiple substrate compatibility
- Wide service temperature range
- Low VOC's
- Initial low tack for adjustability
- Exceptional for airtightness
- Custom widths available: MOQ's apply

AVAILABLE SIZES
150mm x 25m
200mm x 25m

PROCTOR YOUBYUTE FLEXI TAPE

- Suitable for corner mould applications
- Highly stretchable
- High tack
- Long term water resistance
- High ageing resistance
- Compatibility with ProctorPassive Rainscreen (RS-IT) & ProctorPassive Wraptite SA/UV-SA
- Air and water tight
- Low emission of VOC

AVAILABLE SIZES	
80mm x 10m	6 rolls/carton

Products - Proctor System Accessories
Sealing Tape for Penetrations & Fixings

PROCTOR YOUBYUTE SEALING TAPE

- High tack
- Long term water resistance
- High ageing resistance
- Compatibility with ProctorPassive Rainscreen (RS-IT) and ProctorPassive Wraptite SA/UV-SA
- Air and water tight
- Low emission of VOC

AVAILABLE SIZES	
50mm x 20m	12 rolls/carton

Products - Proctor System Accessories
Joining or Seam Tapes

PROCTORWRAP HIGH TACK PLUS TAPE

— Airtight bonding and sealing of overlaps of air and vapour barriers and vapour permeable wraps
— Suitable for bonding of smooth and slightly rough surfaces
— Can be used to provide a bond between steel or timber framing and wraps prior to the immediate mechanical fixing of the wrap
— High initial bond strength
— High initial tack adhesion
— Multiple substrate compatibility
— High-strength spun-bonded carrier
— Low VOC

AVAILABLE SIZES	
60mm x 20mm	18 rolls per carton

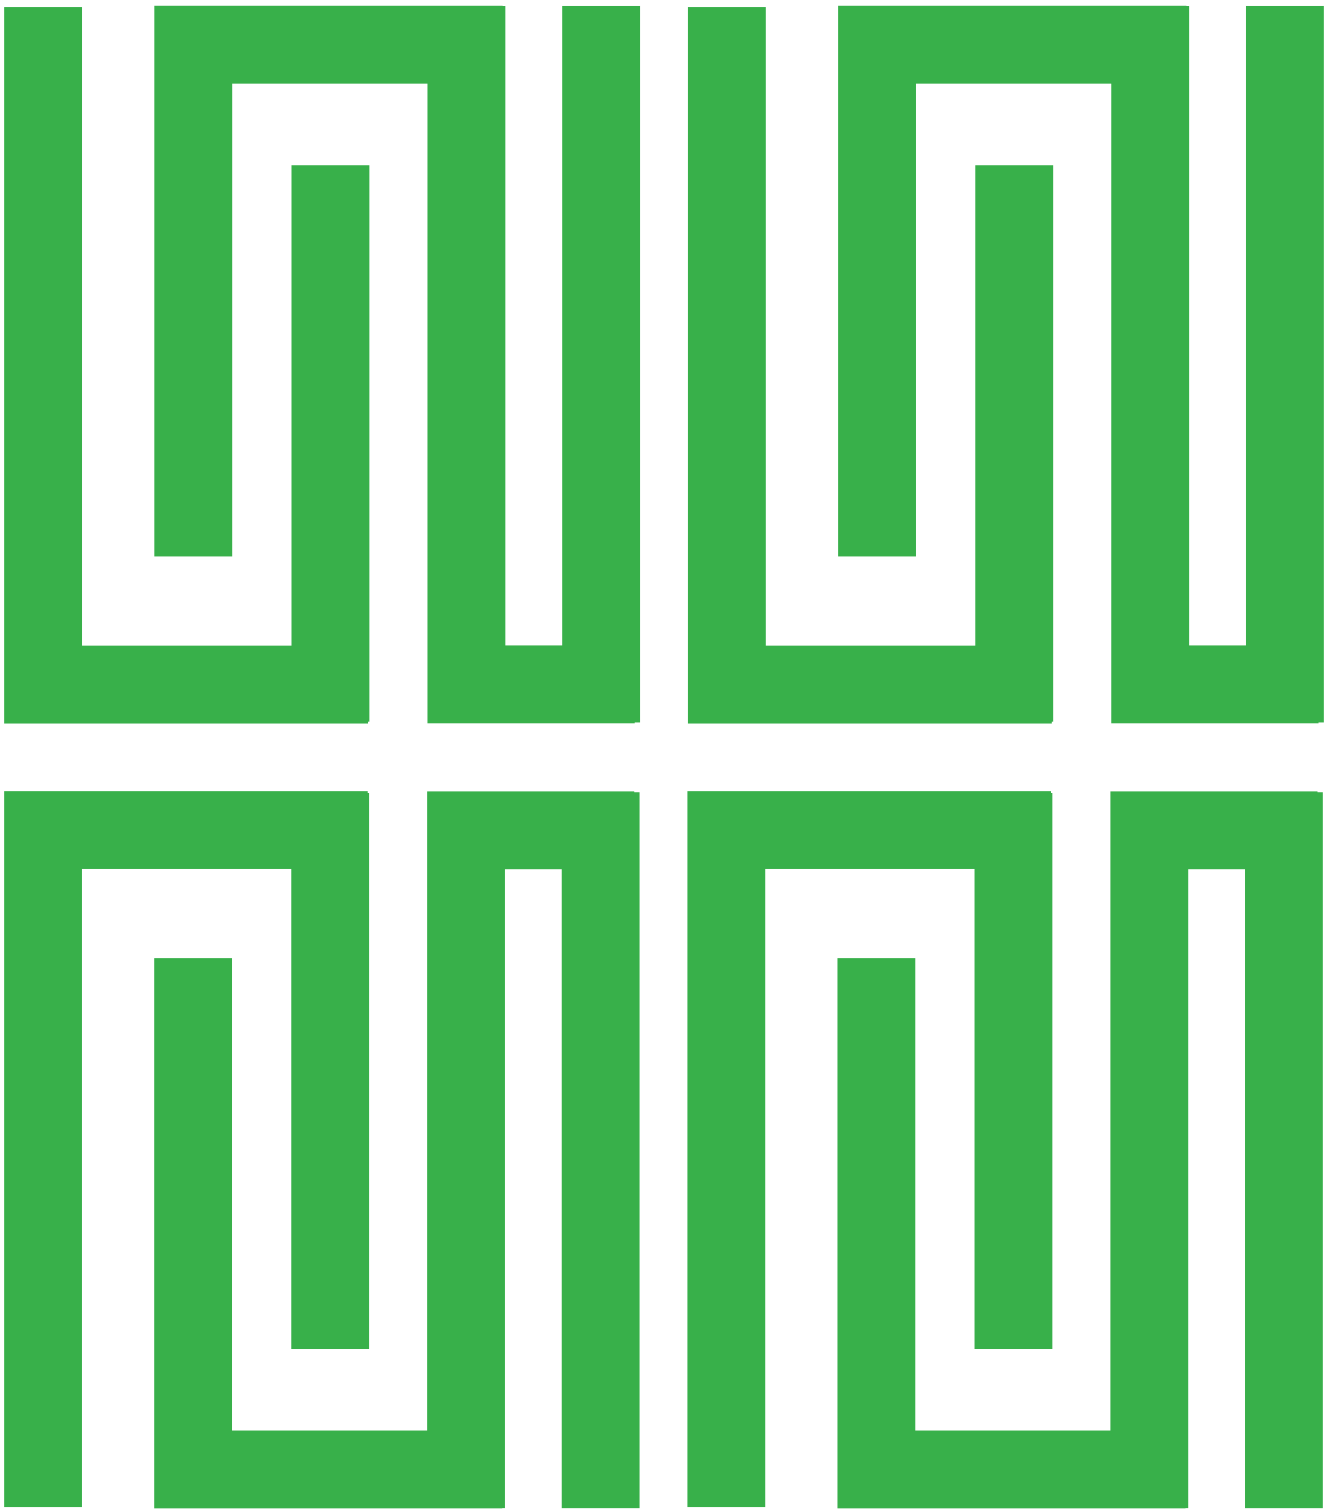

PROCTORWRAP YOURIPPA DUO TAPE

— Ideal for airtight bonding and sealing of overlaps of air and vapour barriers and vapour permeable wraps
— Suitable for bonding of smooth and slightly rough surfaces
— Can be used to provide a bond to steel or timber framing prior to the immediate mechanical fixing of the wrap
— Double sided tape
— Easy to tear without needing a cutter or scissors
— Quick and easy to use
— Black carrier for visibility of tape location
— Release liner for 2 stage application
— Moisture resistant

AVAILABLE SIZES	
30mm x 20m	32 rolls per carton
